## EDUCATION

### Bharati Vidyapeeth Deemed University

B.Tech in Electronics & Communication Engineering, 8.45 CGPA

Pune  
2021–2025

## EXPERIENCE

### Qurore B2B

Aug 2025 – Nov 2025

Full Stack Developer Intern

- Building a full-featured HRMS platform with React.js, Tailwind CSS, and Shadcn UI for modular design consistency.
- Developing backend APIs with Node.js and Express.js, integrating MongoDB, Redis, and JWT authentication.
- Configured AWS and Vercel CI/CD pipelines ensuring scalability and optimized app deployment.
- Implemented payroll, attendance, and employee management modules reducing manual workflow by 70%.

### SAIL

Jun 2024 – Aug 2024

Frontend Web Development Intern

- Worked on building basic web pages and UI screens using React.js and Tailwind CSS.
- Connected simple REST APIs to display data on the frontend.
- Helped improve layouts, styling, and mobile responsiveness.
- Used Git and GitHub to track changes and work with the team.

## PROJECTS

### FluxHire – Hiring Platform SaaS | MERN, GraphQL, Tailwind, Cloudinary

- Built a production-grade hiring platform using the MERN stack with separate portals for Admins, Employers, and Job Seekers.
- Developed a GraphQL API with Node.js and Express enabling secure role-based authentication, employer job posting, and candidate applications.
- Designed MongoDB schemas for users, jobs, employers, and applications with optimized aggregations for dashboard insights.
- Implemented an admin panel in React with Tailwind CSS featuring user management, job analytics, and protected routes via JWT.
- Integrated Cloudinary for resume/PDF uploads, Google APIs for calendar scheduling, and WhatsApp messaging for automated notifications.

### AI Product Recommender | MERN, Tailwind CSS, REST API, Perplexity AI

- Developed a full-stack AI-driven recommendation platform combining database queries and Perplexity AI for personalized product suggestions.
- Implemented JWT-based authentication, caching system, and RESTful APIs improving recommendation response time by 40%.
- Built responsive UI using React 18, Vite, and Tailwind CSS with dynamic product insights in markdown format.
- Deployed on Vercel achieving 99% uptime and multi-user scalability.

### AI-Powered Job Portal | MERN, Tailwind CSS, Perplexity AI, Clerk

- Developed a job portal supporting 1K+ sessions with AI-based job matching and description generation.
- Integrated Clerk for Google, GitHub, and LinkedIn authentication with 90% login success rate.
- Used modular React components and Tailwind CSS for responsive front-end architecture.
- Designed backend with Express.js and MongoDB for scalable, low-latency data transactions.

## TECHNICAL SKILLS

**Front-End:** HTML, CSS, JavaScript, React.js, Tailwind CSS, Shadcn UI, WordPress, WooCommerce

**Back-End:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Redis

**Database:** MongoDB (Atlas), MySQL

**DevOps & Deployment:** AWS, Vercel, Railway (CI/CD), Docker (Basic)

**Programming:** Python, JavaScript

**Developer Tools:** Git, GitHub, Visual Studio Code, Postman

**Other Skills:** AI API Integration, Cloud Deployment, Scalable System Design, Plugin Customization

## CERTIFICATIONS

Full-Stack Web Development with React and Node.js

Full-Stack AI with Python — Hands-on LLM Integration & Deployment
