

Mohammad Kazim

Full-Stack Engineer — React/TypeScript, Laravel & AI Integration

+91-7898184847 | mohammadkazim71@gmail.com | Noida, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full-Stack Engineer with 1.5+ years building React/TypeScript interfaces and PHP backends, with production experience integrating LLM APIs (OpenAI, Gemini) via prompt engineering. Shipped a React/TypeScript operator dashboard, a RAG-grounded AI assistant, and a production multi-tenant SaaS platform.

Technical Skills

Languages	JavaScript, TypeScript, PHP, Python, SQL
Frontend	React, Next.js, TypeScript
Backend & PHP	Laravel-pattern MVC, PHP (OOP), WordPress/ACF, Node.js, Express.js
AI / LLM	Prompt Engineering, OpenAI API, Gemini API, RAG, AI Guardrails
Databases	MySQL, PostgreSQL, MongoDB
Tools & DevOps	Git, GitHub Actions (CI/CD), Docker, AWS EC2/Oracle Cloud

Experience

Software Engineer — Full-Stack & AI Integration

Mar 2026 – Aug 2026

EZ Rankings

Noida, India

- Maintained and debugged a production PHP website built on Laravel 11 — fixed bugs, shipped feature updates, and resolved deployment issues on an existing codebase.
- Designed prompt engineering workflows integrating OpenAI's API into internal tools via n8n, wiring LLM calls, webhooks, and third-party APIs into multi-step automations covering 15+ business processes.
- Automated multi-step operational workflows end to end, cutting manual effort by 40% and enabling self-service dashboards used daily by 50+ people.

Associate Software Engineer

Feb 2025 – Feb 2026

Clay Brains

Delhi, India

- Developed backend modules and REST APIs in JavaScript and Python; debugged and optimized SQL/database queries, cutting query time by 60% on the production database.
- Built JWT/RBAC authentication modules and real-time WebSocket services; deployed via GitHub Actions CI/CD, maintaining 99.9% uptime across 5+ environments.

Projects

GrowScience — AI Nutrition Assistant (Python, OpenAI API, Prompt Engineering, RAG)

- Wrote 15+ prompt chains and a RAG layer over 200+ product documents so responses cite real product data instead of the model guessing.
- Designed guardrails for 8 mapped failure modes — prompt injection, hallucinated claims, and a hard escalation-to-human rule for medical topics.

LeadPulse / NorthQu — Multi-Tenant Lead Intelligence Platform (Next.js 14, Node.js/Express, TypeScript, PostgreSQL/Supabase, Oracle Cloud)

- Engineered and maintained a production multi-tenant lead-capture and identity-resolution platform spanning backend APIs, PostgreSQL, admin dashboards, infrastructure, and CI/CD.
- Reduced visitor-list load time 11.7× (6.1s → 525ms) via query optimization and server-side aggregation; diagnosed silent 1,000-row PostgREST truncation across analytics endpoints.
