SUMMARY

Software Engineer with 1.5+ years of experience building AI-powered applications, backend platforms, and customer-focused software solutions using Python, JavaScript, TypeScript, GraphQL, FastAPI, React, and LLM technologies. Built production AI assistants, prompt engineering frameworks, GraphQL-enabled platforms, n8n-based agentic automation workflows, and cloud-native systems using Docker, PostgreSQL, Redis, and RabbitMQ. Passionate about translating business challenges into scalable AI solutions through customer collaboration, rapid prototyping, and iterative delivery.

EXPERIENCE

Software Engineer — AI Systems & Automation Mar 2026 – Present
EZ Rankings Noida, India

- Designed and implemented AI-enabled backend services and APIs supporting customer-facing applications, enabling rapid deployment of production solutions across 15+ business workflows.
- Built agentic automation workflows using n8n, integrating LLM nodes, webhooks, and third-party APIs to automate multi-step business processes without custom backend code.
- Collaborated with business stakeholders to translate operational challenges into scalable automation and AI-driven workflow solutions, reducing manual effort by 40% and enabling self-service dashboards used by 50+ stakeholders.

Software Engineer — Backend & Infrastructure Systems Feb 2025 – Feb 2026
Clay Brains Delhi, India

- Designed production backend services and data pipelines on AWS EC2 with 99.9% uptime; improved system query performance by 60% through database optimization for customer-facing systems.
- Built secure authentication and authorization systems (JWT, RBAC) and real-time monitoring solutions, reducing issue-detection time by 30% across production API surfaces.

PROJECTS

AirLynk — Cloud-Native AI-Ready Transportation Platform airportlimolink.ca

- Designed and developed a cloud-native transportation platform supporting real-time booking, authentication, pricing, notifications, and operational dashboards for 300+ service locations.
- Implemented GraphQL and REST APIs enabling efficient communication between customer and operator apps; built React/TypeScript operator dashboards; engineered event-driven workflows using RabbitMQ and Redis supporting 500+ daily transactions.
- Integrated observability using Prometheus, Grafana, Loki, and OpenTelemetry; containerized the platform using Docker Compose and CI/CD pipelines with layered, repository-pattern architecture.

Tech: Python, FastAPI, GraphQL, React, TypeScript, PostgreSQL, Redis, RabbitMQ, Docker, OpenTelemetry, Grafana

GrowScience — Enterprise AI Agent https://chatbot.senadvertising.com/

- Designed enterprise AI agent architecture using prompt engineering, RAG, and AI safety guardrails across 15+ prompt frameworks integrating 200+ documents for domain-specific recommendations.
- Developed prompt injection detection, emergency escalation logic, and hallucination mitigation across 8 AI risk categories; collaborated with stakeholders to translate requirements into AI-powered experiences.
- Designed a 4-phase scalable AI roadmap supporting multilingual interactions, conversation memory, and future enterprise integrations.

Tech: Python, OpenAI, Prompt Engineering, RAG, AI Safety

StructuraUI — AI-Powered UI Generation Platform github.com/Kazim71/StructuraUI

- Built an AI SaaS platform using Google Gemini to generate editable UI layouts from natural language prompts, supporting 20+ component types and reducing design-to-code time by 70%.
- Designed iterative AI editing workflows with RBAC and secure authentication, enabling users to modify UI components through natural language interaction.

Tech: Next.js, Gemini, TypeScript, React

SKILLS

AI Engineering	Agentic AI, LLM Applications, Prompt Engineering, RAG, AI Safety, AI Evaluation, OpenAI, Anthropic Claude, Google Gemini
AI Automation & Orchestration	n8n, Agentic Workflows, Workflow Orchestration, Webhooks, LLM Tool-Calling, AI Agent Frameworks
Languages	Python, JavaScript, TypeScript, GraphQL, SQL
Frontend	React, Next.js, TypeScript
Backend	FastAPI, Node.js, Express.js, REST APIs, GraphQL APIs, JWT, OAuth2, WebSockets
Databases	PostgreSQL, MySQL, Redis, MongoDB
Cloud & DevOps	Docker, GitHub Actions, RabbitMQ, Linux, CI/CD
Engineering	System Design, API Design, Microservices, Observability, Git

EDUCATION

Bharati Vidyapeeth Deemed University, Pune 2021 – 2025
Bachelor of Technology in Electronics & Communication Engineering CGPA: 8.45/10
