PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience developing and maintaining production applications, backend services, automation workflows, and database-driven systems. Experienced in Python, JavaScript, SQL, REST APIs, Linux, Docker, AWS, and cloud deployments. Delivered solutions across 15+ production environments involving API integrations, data processing, database optimization, infrastructure troubleshooting, and application reliability. Strong foundation in software engineering, scalable system design, debugging, testing, and cross-functional collaboration.

EDUCATION

Bharati Vidyapeeth Deemed University

Bachelor of Technology - Electronics & Communication Engineering
CGPA: 8.45/10

Pune, India
Aug 2021 – Jun 2025

EXPERIENCE

Backend Developer

EZ Rankings

Mar 2026 – Present
Noida, India

- Developed and maintained backend workflows, APIs, and database-driven applications across 15+ production systems.
- Built Python automation utilities for CSV ingestion, data validation, reporting, and workflow automation.
- Designed and integrated REST APIs, business validation layers, and data-processing workflows.
- Investigated and resolved production incidents involving API failures, deployment regressions, and database inconsistencies.

Junior Web Developer

Clay Brains

Feb 2025 – Feb 2026
Delhi, India

- Developed backend modules, reusable services, and data-driven features for production applications.
- Improved database performance through SQL query optimization, indexing strategies, and execution plan analysis.
- Managed Linux-based cloud infrastructure including AWS EC2, SSL configuration, DNS management, and deployment workflows.
- Participated in debugging, testing, code maintenance, and release activities across multiple projects.

PROJECTS

Airport Reservation Dispatch Management Platform

airportlimolink.ca

Python, Node.js, SQL, REST APIs, Linux

- Developed backend workflows supporting booking requests, ride scheduling, customer enquiries, and administrative operations.
- Designed database-driven processing pipelines for service locations, trip management, and operational reporting.
- Built bulk data ingestion workflows that automated onboarding and management of 100+ service locations.

E-Commerce Catalog Content Management Platform

spacesbyu.com

Node.js, SQL, REST APIs, Linux

- Contributed to backend systems supporting a large-scale product catalog containing hundreds of products and categories.
- Developed reusable data models and administrative workflows that streamlined content publishing operations.
- Optimized database-driven filtering, search, and catalog management processes to improve performance and maintainability.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, PHP

Backend Development: FastAPI, Node.js, Express.js, REST APIs, API Integration, Authentication, Authorization

Databases: PostgreSQL, MySQL, Database Design, Query Optimization, Data Modeling, Indexing

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Cloud & Infrastructure: AWS EC2, Docker, Linux, Git, GitHub, DNS Management, SSL, Cloud Deployments

Software Engineering: Object-Oriented Programming, Data Structures, Algorithms, Unit Testing, Debugging, Code Reviews, Agile Development

Systems & Networking: Operating Systems, TCP/IP, HTTP, System Design Fundamentals, Performance Optimization, Production Troubleshooting
